0929-882-333

PROFILE

I graduated with Bachelor's degree in Computer Engineering from Tamkang University.

I think I am enthusiastic and responsible for my work, and also can get along well with the team. I have participated in the company's internship and have the experience of following the team to develop two projects. This experience, let me cultivate good program habits, communicate with the team efficiently, and improve my technical ability.

Although I do not have more experience in the front-end related workplace, I spent a lot of time making research and building some side projects in my spare time and learning new knowledge quickly. I will keep accumulating more side projects, and try to use more new technologies in each project.

EXPERIENCES

MiTAC 2020-2022
Junior software developer (Include Intern)

- use Java, and Spring MVC to maintenance, and ongoing development of the backend system
- database connection, query, and improvement.
- use HTML/CSS/Jquery to finish the View
- performance and stress testing

PROJECT

My Website
React, Next.js, TailwindCSS

- The place that can let people know me faster.
- In the future, I will develop a backend system to improve the convenience of the expansion.

COVID-19 Report and Schedule System
React, Next.js, TailwindCSS, MySQL, MongoDB, Typescript

- In order to reduce duplicate workflow, I develop this system when I was serving in the army.
- Recorded patient information and medical treatment status.
- Recorded employees' work itinerary.

FUTURE

- Build my own React UI Library
- Refactor some projects I have built
- Use Typescript more often in my future project
- Try to participate in open source team

SKILLS

HTML/CSS   Javascript

React   Next.js   Java

Node.js   MySQL/Mongodb

EDUCATION

Tamkang University

2017 - 2021 | Bachelor in Computer Engineering
